Interests

Web development

Artificial intelligence

OBJECTIVE

Graduate with a Bachelor's in Electronics and communications looking to leverage my experience and to solve interesting problems that delight end-users.

PROJECTS

[Quiz app](#)

Successfully designed an Ajax based quiz web app using HTML/CSS , JavaScript and using external API for the data fetching which includes questions and answers in Json format, Browser's local storage is used to store top five scores of the players.

[Food nutrition app](#)

Built an Ajax based Food analysis app to allow users to know about the nutritional content of a specific food along with the recipe. used an external API for data fetching provided by the food website (edamam.com).

[Landing page](#)

Designed a responsive landing page with stunning visual images using re-useable functional components of Reactjs and it's library styled-components for styling.

[Portfolio](#)

Made a simple portfolio to know more about me and my other projects using Reactjs and deployed it to netlify.

Head movement tracking system (major project)

Successfully completed head movement tracking system using MEMS sensor and programmed Arduino.
